treat, cure, or prevent any disease.

HC-FIT

Capsules made from a blend of natural ingredients –Tepozan, Papaya Seed, White Horehound and Hawthorn Leaf– that support your weight loss and regulate gastrointestinal functions.

It achieves your optimal well-being which gives overall wellness to your body, It manages your weight, decreases your appetite and supports your bowel transit due to the numerous elements contained in its active ingredients, the most notable being essential fatty acids, omega-3, 6 and 9, vitamins and minerals.

Its ingredients were carefully selected due to their properties to support your basal metabolic rate during digestion, as well as manage your body weigh

BENEFITS

Recommended for weight loss

Helps regulate blood pressure levels

Supports gastrointestinal diseases

Improves the beneficial macronutrient absorption (carbohydrates, proteins and fats)

Helps reduce body fat

Powerful antioxidant that prevents cellular aging

Promotes healthy glucose, cholesterol and triglyceride levels

TEPOZAN

Its scientific name is Buddleja Cordata and it is a bush from the Scrophulariaceae family, native to Mexico and Guatemala; it has been used for centuries for physical healings. Tepozan is a plant species well known for its flavonoid and iroid properties.

It is currently known for its antiinflammatory properties and used to control muscle, bone and neuropathic pain. It contains antineoplastic properties which may help reduce blood glucose levels.

PAPAYA SEEDS

These seeds come from the Carica Papaya plant and are native to Mexico, Central America and Caribbean Islands. Papaya fruit and papaya seeds are known for its high fatty acid, omega, mineral and antioxidant content, which protect the digestive system against infections, mainly parasitic infections.

It supports the delay in cellular aging and cell damage due to its high vitamins A, B and C, omega-9 and proteins content. In addition, it contains papain, which facilitates the digestion of proteins, fats and carbohydrates to manage your body weight.

WHITE HOREHOUND

It is a herbaceous plant from Lamiaceae family, native to Eurasia and North Africa. It contains essential oils, flavonoids, mineral salts, potassium, iron and vitamin C. Due to its bitter taste, it is used to stimulate the appetite. Its traditional use has been used for a very long time to treat respiratory tract diseases and as an expectorant. Since it is a statin, it regulates cholesterol and uric acid levels.

HAWTHORN LEAF

It comes from the Crataegus Mexican fruit tree, from the Rosaceae family, native to Mexico. It is known for strengthening the immune system; in addition, hawthorn leaf is rich in Vitamins C and B, calcium and pectin. It is used due to its astringent and antispasmodic functions in the digestive system. It helps regulate fluid balance in the body to improve blood pressure and cardiac system.
