# HC PURIFY

Helps eliminate unnecessary toxins and fats generated by bad eating habits.

HC Purify is a supplement made from a blend of natural ingredients —green tea leaf, turmeric, milk thistle, inulin and ginge — that helps ensure the proper functioning of the body.

It also regulates your digestive system and reduces your cholesterol and triglyceride blood levels. HC Purify is a hot/cold tea and comes in 2 flavors: Camu-Camu and Blueberry.

The concentrates used to make our HC Purify Detox Tea are expertly formulated to give your body what it needs in order to regulate your bowel transit and nutrient absorption. Strengthens and regulates your digestive system by stimulating its optimal function to avoid common discomforts, such as constipation, diarrhea and abdominal pain, which are ailments related to irritable bowel syndrome.

## BENEFITS

Regulates the gastrointestinal function

Promotes the uptake of nutrients

Stimulates the development of gut microbiota

Supports an optimal colon cleansing

Reduces gastrointestinal ailments, such as nausea, colic, constipation and abdominal distention.

Regulates peristalsis (bowel transit)

## GREEN TEA

Green tea leaf native to Asia, mainly in China and India. It is a medicinal plant that has been used for thousands of years due to its multiple antioxidant properties and high content in vitamins A, C and E, as well as trace elements. Its properties support the delay in blood vessels degeneration, which protect the body against heart diseases. Due to its thermogenic function, fat burning is achieved, as well as an increase in daily energy. It may reduce risk of diseases, such as cancer.

## TURMERIC

It is an Asian flowering plant native to South-East India. Turmeric contains mainly a polyphenol termed curcumin, as well as polysaccharides, vitamins (A, B, C and Kcomplex) and minerals. It is widely used in many dishes around the world; besides, it is known for its antioxidant properties, which avoid overproduction of free radicals and cell damage, which may prevent the risk of neoplastic diseases. It supports an optimal bowel transit, avoids intestinal malabsorption disorders and optimizes liver function

## MILK THISTLE

Plant native to Mediterranean countries, used for a long time as an active element for many natural remedies to treat hepatic diseases. Its main component is silybin, which is a flavonoid, currently known for its antioxidant effect. Its properties reduce cell damage and tissue ageing, but mainly hepatic, cardiac and neurological damage.

It provides an anti-inflammatory effect and an immunomodulatory activity that may improve the response of the body to treat viral infections

## INULIN

It is a fructan able to create short-chain fatty acids. It is found in roots, tubers and rhizomes such as burdock, dandelion, yacon, chicory, among others. It is classified as a prebiotic that stimulates the development of gut microbiota and regulates digestive processes due to its high fiber content.

## GINGER

It is a rhizome native to Asia, mainly India that is widely used due to its aroma and taste. It is rich in vitamins, mainly C and B, and minerals, such as potassium, calcium and phosphorus. Gingerol, its major component, is an essential oil and responsible for its spicy taste, which is used in medicine due to its antiinflammatory properties. Its effectiveness in reversing digestive symptoms has been shown. Some of the ailments it can treat are dyspepsia, nausea, spasm and gut inflammation. In addition, ginger improves the bowel transit due to its fiber content.
